------------------	---

## **Professional Experience:**

**Collabera.INC,**

**Baroda, Talent Specialist**

**Dec 2021 – May 2022**

### **Responsibilities:**

As a talent specialist I worked for Citi Groups and Bank of America mainly for the STS (Shared Technology Services) group and also in various other locations. As a talent specialist I was able to improve my communication and interpersonal skills. I worked in co-ordination with various departments and was responsible for the entire hiring process of my candidates. When working for Bank of America I got to work on a lot of technical requirements for Software developers, App developers and Testing.

**BOTS Cycling PVT LTD,**

**Bangalore, Bike Technician**

**Aug 2021 – Dec 2021**

### **Responsibilities:**

As a professional bike mech in BUMSONTHESADDLE I was responsible for pitching in service and bike maintenance suggestions. As it was a small scale business I had to work with our sales, marketing and inventory team which helped me improve my communication skills a lot.

**Maini Precision Producs,**

**Bangalore, Junior Engineer**

**June 2021 – Aug 2021**

### **Responsibilities:**

As a junior engineer I worked in the production line of Valve retainers used in automobile engines. When working here I was accountable for keeping the track of various things like checking the defects in manufactured products, checking for their dimension and making sure the product is in the tolerance range, tracking the tool life and making sure the machine is running properly by regularly checking for any faults in the machine

## **Internships / Projects:**

**Deploying a website in Azure**

**Independent**

**Jan 2023 – Mar 2023**

The goal was to deploy a website using virtual machines in Azure. For this I deployed 4 servers using Azure virtual machine, 2 in South India and 2 in The US. To connect to the sever I used Putty as Terminal Emulator. I installed Apache2 to configure the servers. Deployed load balancer in Azure using application gateway.

**FE Analysis of Permanent Magnet Bearings**

**MIT, Manipal**

**Jan 2020 – Sept 2020**

The task was to analyse the axial and thrust loads that act on the bearing in different load conditions and bearing configurations

### **Trainee**

**Deccan Plast Industries, Bykampady**

**May 2019 – June 2019**

As a part of curriculum I have participated in 1 month industrial training under Deccan Plast Industries, As a trainee I got to get hands on experience on various manufacturing processes. I also got to know in depth how small scale industries work.
